Examiner's Reason for Allowance

1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach a stripper assembly for a mold having a first slide pair and second slide pair symmetrically arranged about a centerline bisecting a mold face, each slide pair having an outer and inner slide, a first connecting bar connected to an inner slide of the first slide pair, a second connecting bar connected to an inner slide of the second slide pair, a third connecting bar connected to an outer slide of the first slide pair, a fourth connecting bar connected to an outer side of the second slide pair, the first and second connecting bars moving in a direction towards the centerline when opening the slide pairs, an actuator coupled to the first and second connecting bars, a first transmission means connected to the first connecting and third connecting bar and a second transmission means connected to the second and fourth connecting bar. The closest prior art, Spurr and Harrison, fails to teach the actuator coupled to the first and second connecting bars and the first and second transmission means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. A new submittal of the drawings is necessary due to the image quality on record. A line can be observed running through all the sheets of drawing and the drawings need to be rescanned for better quality.
